*“When we think of breakfast, it should be just that – Break Fast. Your body has been replenishing and recovering overnight. The first meal of the day should top up your energy stores and provide a long lasting source of energy. It is also important to start your hydration practices for the day – juices that contain vegetables and lots of colour are a great way to take in a wide variety of vitamins and minerals.”*

*Kerry Leech, Nutritionist*

Although every possible precaution has been taken to ensure that these menu items are allergen free, certain items may still contain traces of allergic ingredients as they are prepared in facilities that also process milk products, egg products, gluten containing products, fish, crustacean, soybean, lupin, sesame seeds and nut products.

*"All of the lunch choices are designed to provide maximum nutrition through the use of colourful vegetables, grains and seeds, while not limiting flavour. Look for foods with plenty of colour to provide antioxidants, wholegrains for fuel, lean proteins to keep you satisfied through the afternoon but still light enough to keep you comfortable."*
